

SBT2000S Series

Specially Designed for Large Parcel Delivery
and Users with Physical Disabilities

SBT2000S Single-lane swing barrier turnstile

SBT2011S Single-lane swing barrier turnstile
(w/ a controller and a RFID reader)

SBT2022S Single-lane swing barrier turnstile
(w/ a controller and a fingerprint & RFID reader)

The SBT2000S Series of wide-passage single-lane swing barriers is an elegant and cost-effective entrance control system specially designed for large parcel delivery and people with physical disabilities.

The SBT2000S Series offers a single-lane swing barrier designed for smooth and quiet operation and draws very little power. The width of the lane is 800mm. The default gate opening/closing time is 3 seconds. The sensitive infrared sensor installed at the bottom part of the gate could avoid accidental hurt by the moving barrier glass. Besides, during a power outage, users could simply push and open the gate then leave the area.
